FREELANCE EXPERIENCE

Freelance Web Designer / Front-End Developer

Student Clients — Freelance

- Designed and developed portfolio websites for student clients.
- Created clean and modern front-end designs focused on usability and visual presentation.
- Built responsive websites using HTML, CSS, React.js, Next.js, and Tailwind CSS.
- Designed website interfaces and layouts based on client requirements.
- Adapted designs for different screen sizes and devices.
- Solved design and development issues throughout the project.

SELECTED PROJECTS

Personal Portfolio Website

React.js | Next.js | Tailwind CSS

- Designed the complete UI and visual layout, then developed it using React.js and Next.js with Tailwind CSS for a responsive, mobile-friendly experience.

Graphic Design & Thumbnail Projects

- Created thumbnails and digital graphics for personal and student projects using Photoshop and Canva, applying composition, typography, and visual hierarchy.

AI Video Creation Projects

- Created and edited AI-generated video content using Veo, Kling, Sora, and CapCut; experimented with AI visuals for digital content and advertisements.
